1 This communication is in response to applicant's RCE, which was filed October 16, 2006.

Amendments and arguments to rejected claims 1-18 have been entered and made of record in the application of Lee "Touch panel device and method of fabricating the same" filed on June 27, 2003.

Claims 1, 2, 10 and 11 are currently amended.

Claim 4 is as previously amended

Claims 3, 5-9 and 12-18 are the same as originally filed.

Claims 1-18 are pending.

Allowable Subject Matter

- 3 Claims 1-18 are allowed as evident by applicant's amendments and arguments.
- The following is an examiner's statement of reasons for allowance: The prior arts of record disclose, teach or suggest a touch panel device and a method of fabricating the same having a first substrate and a second substrate comprising a wiring terminal, a flexible printed circuit film connected to the wiring terminal, an adhesion part

corresponding to a location where the flexible printed circuit film is connected to the wiring terminal, and an adhesion-reinforcing part formed on e rear surface of the touch panel device that increases an adhesive bonding strength of the adhesion part.

However, the prior arts of record fail to disclose, teach or suggest the wiring terminal being formed on a front surface of any one of the first and second substrate, an adhesion part substantially corresponding to a location where the flexible printed circuit film is connected to the wiring terminal, and an adhesion-reinforcing part formed on a rear surface of the substrate on which the wiring terminal is formed to strengthen a bonding strength of the adhesion part.
